

Screening won't protect your patients from most HPV cancers.

protect your preteen patients today with HPV vaccine.

Cervical Cancer Just the tip of the iceberg.

Even with screening, in the United States
12,000 women are diagnosed with
cervical cancer each year.

Source: CDC. Cancers associated with human papillomavirus, United States—2010–2014. USCS data brief, no. 1. Atlanta, GA: Centers for Disease Control and Prevention. 2017. (<https://www.cdc.gov/cancer/hpv/pdf/USCS-DataBrief-No1-December2017-508.pdf>)

Cervical cancer is the only type of HPV cancer for which there is a recommended screening test.

Cervical Precancers

While cervical precancers are routinely screened for, these precancers may require invasive testing and treatment.

Cervical
Precancers

Recommended cancer screening tests are not available yet for these cancers. These cancers may not be detected until they cause health problems.

OVER 90%
of HPV cancers are preventable
through HPV vaccination.

Source: CDC. Cancers associated with human papillomavirus, United States—2010–2014. USCS data brief, no. 1. Atlanta, GA: Centers for Disease Control and Prevention. 2017. (<https://www.cdc.gov/cancer/hpv/pdf/USCS-DataBrief-No1-December2017-508.pdf>)

Don't rely on screening to catch it later.
Protect them now with HPV vaccination.
